Bird Chat is a software suite, including server and client components, providing tools and environment to run instant messaging and chat application on the server side. As much clients may be installed and launched for users on workstations. Instant messaging may be used as collaborative in working production environment, or in playing or thematic groups as well. The server component is designed to manage users with sufficient security conditions, with users' flow control mechanism to control possible garbage on the server from robots and automated messaging external software. Another feature is designed using customizable artificial intelligence for chat animation by generating a regulated traffic. The software technology used allows low resources consumption either on the server and the client side using few internal and network power. So the server can manage lots of clients without overflow risks. The server user interface provides features for regular transactions and a log file stores events and transactions to allow traceability and security of the system. The client user interface is easy to use and powerful. Users can manage a list of available servers, iwhen participating to several users networks. [?] graphical user interface (GUI), kick support, passwords encryption and censoring tool on the server side [?] cut / copy / paste compatibility for Microsoft Windows tools, hyperlinks support and administrators management on the client component

What's New in This Release: [?] ADDED : About window. [?] ADDED : Support for file transfert. (Oliv) [?] PREPARED : WindowsNT Service. [?] PREPARED : Admis can promote admin (#082211045801). [?] FIXED : Port number in log. [?] FIXED : Port number displayed. [?] FIXED : bug with some alias. [?] FIXED : Vulnerability with aliases. [?] ADDED : Server disconnect support.(Lars) [?] ADDED : Support for bc:// URLs. [?] ADDED : Option window. [?] ADDED : Option to disable sound. [?] ADDED : Option to display time on each message. [?] OPTIMIZED : Client list. [?] OPTIMIZED : Saving server. [?] OPTIMIZED : Bug with application path. [?] MODIFIED : Text lenght. (#1084709) [?] MODIFIED : About text. ◆

#### What's New In?

Bird Chat (BC) is the first instant messaging software based on open source. This software suite provides everything you need to start an instant messaging network easily: a server component, that you install on your machine, and a client component that will be run on other users' machines. The server component enables you to manage your network with security features such as a registration scheme and a user logging mechanism, and also to have a log of events and server network transactions that will provide traceability and security. The client component is easy to use and supports a choice of different clients with many features. Bird Chat can run on Microsoft Windows operating systems. You can choose whether to work with a graphical interface or a text mode (based on external interfaces). The client component supports many external interfaces, such as IRC, MSN, ICQ, Yahoo! and others. Once the servers are installed, it is very easy to create a chat room, add users, chat, and perform different operations. You can install the server component on as many machines as you want. This server component can manage users with sufficient security conditions, using flow control to limit possible garbage in the server from robots and automated messaging. The server component is designed to be run on Linux systems using the network service Daemon.

Features: [?] graphical user interface (GUI), kick support, passwords encryption and censoring tool on the server side [?] cut / copy / paste compatibility for Microsoft Windows tools, hyperlinks support and administrators management on the client component [?] built-in security features, user account manager, user log, log file, support for more than 20 client interfaces, such as IRC, ICQ, MSN, Jabber, Yahoo!, AIM, Google, web-based and many more... What's New in This Release: Server : [?] ADDED : Security features. (#13180549) [?] ADDED : Log file. [?] ADDED : Support for Microsoft Windows tools. [?] ADDED : Admis can promote admin (#082211045801). [?] ADDED : Support for some external interfaces. [?] ADDED : Security check on aliases. [?] ADDED : WindowsNT Service. [?] ADDED : About window. [?] PREPARED : Port number in log. [?] PREPARED : Display port number. [?] PREPARED : Bug with some alias. [?] PREPARED : Default port. [?] FIXED : Bug with user history on alias. [?] FIXED : WindowsNT Service. [?] FIX

**System Requirements:**

**Minimum:** OS: Windows Vista (32bit or 64bit) Processor: CPU: Dual core CPU, 2.2 GHz or better Memory: RAM: 1 GB or more Video: DirectX: Version 9.0c Network: Broadband internet connection Hard disk space: 4 GB or more Recommended: OS: Windows 7 (32bit or 64bit) CPU: Quad core CPU, 2.4 GHz or better Memory
